Thermotech's Stone Veneers

THERMOTECH MASONRY SPECIALIZES in a wide variety of stone veneers. The style shown above and on the right is *Norumbega Natural*, also known as *Heritage Valley*—random ashlar veneer with jumpers. This visually engaging

Mondrian-like style involves meticulous cutting and fitting to achieve maximum design continuity.

WE DISPLAY SEVERAL styles of fieldstone veneer on the exterior of our headquarters.

On the left we have Forgotten Stoneworks come-to-level veneer with giant quoins, fieldstone and rectangular rocks. Below is very large veneer with come-to-level veneer above. This massive style

also features a beach stone panel with sea glass, beach rock and sea

shells, and a lintel of Tenant's Harbor Dark.

WE BACK ALL veneers with Tytar and Delta Dry for maximum drainage.
